

Porto, Portugal. 30 March - 1 April 2016 http://www.evostar.org

The 16th Conference European **Evolutionary Computation in Combinatorial** Optimisation is a multidisciplinary conference that brings together researchers working on metaheuristics for solving difficult combinatorial optimisation problems appearing in various industrial, economic, and scientific domains. Prominent examples metaheuristics include: evolutionary algorithms, simulated annealing, search, scatter search and path relinking, memetic algorithms, ant colony and bee optimisation, particle colony optimisation, variable neighbourhood search, iterated local search, greedy randomized adaptive search procedures, estimation of distribution algorithms, and hyperheuristics. Successfully solved problems scheduling, timetabling, network design, transportation and distribution problems, vehicle routing, travelling salesman, graph *************************

problems, satisfiability, energy optimisation problems, packing problems, and planning problems.

Submissions must be original and published elsewhere. The submissions will be peer reviewed by members of the committee. The accepted papers will have to improve their paper on the basis of the reviewers comments and will be asked to send a camera ready version of their manuscripts. At least one author of each accepted work has to register for the conference, attend the conference and present the work.

The reviewing process will be double-blind, please omit information about the authors the submitted paper. Submit manuscript in Springer LNCS format.

Important Info

Submission format: Springer LNCS, double-blind review Submission deadline: 1 November 2015

Page limit: 16 pages

Submission link: http://myreview.csregistry.org/evocop16/

Programme Chairs

Francisco Chicano (chicano@lcc.uma.es) Bin Hu (bin.hu@ait.ac.at)

Special Issue in Journal of Heuristics

Selected papers will be invited to extend their work for the Special Issue
